Blue Book Suggested Retail Value

Kelley Blue Book Suggested Retail Value is representative of dealers' asking prices for a used car, and the starting point for negotiation between a consumer and a dealer. This Suggested Retail Value assumes that the vehicle has been fully reconditioned and has a clean title history, but has not been certified in accordance with any Certified Pre-Owned (CPO) program the automaker may offer (for which it may or may not qualify, according to factors such as vehicle age and mileage). This value also takes into account the dealers' profit, costs for advertising, sales commissions and other costs of doing business. The final sale price will likely be less depending on the vehicle's actual condition, popularity, type of warranty offered and local market conditions.
