About This Game

About the game

Meganoid is a challenging platformer, generating new levels on every play session. Find many items to enhance your character and his abilities while you descend down into the Meganoid space ship. Do you rush for the exit, or do you take your time to collect everything there is, barely escaping the security drones that will hunt you down if you linger.

Key features

- Levels randomly generated on every game session, based on a set of templates, making the levels unique but familiar at the same time.
- A platformer with “roguelike” elements. Consumables, alternate routes, procedural generation, and many devices and gadgets add depth to the challenging gameplay of the original Meganoid
- A lot of collectible items that will change the main character’s abilities to navigate the world. Find a jetpack to start flying around, find anti-gravity-boots to perform double jumps, and much more.
- Hidden bonus area’s to find and unlock. Often providing you with a short-cut or very rare and powerful items.
- A hackable game world. Finding green key-cards allows you to modify how certain elements of the game act and respond to you. Stop rocket-launchers from working, make rockets fly less far, make destroyed robots drop extra lives.
- Unlock the database with info on all the items and enemies you encounter to be better prepared on your next try.
- In true Meganoid tradition, you’ll die a lot in many different ways, but you’ll learn to overcome the difficulties, learn how the Meganoid world operates, and eventually get to the bottom of it!

Title: Meganoid
Genre: Action
Developer:
Orangepixel
Publisher:
Orangepixel
Release Date: 29 Mar, 2017

b4d347fde0

Minimum:

OS: Windows 7 or higher

Processor: 2.0 ghz Dual Core

Memory: 2 GB RAM

Graphics: Intel HD3000 or higher with OpenGL 2.1 support

Love Orange Pixel games. Meganoid Game is fun, simple and rogue-likeishly hard. please dev fix xbox 360 controller support on iMac doesn't work at all.. I know that I'm suppose to leave a really long informative review here but after seeing that there are hardly any reviews and the game lacks an average review score, I felt I had to leave something because I love this game, While OrangePixel is well know and respected in the mobile gaming world, I think that his games go underappreciated in the PC realm. So there a positive review because Meganoid deserves it!. Looks like this is trying to be a sci-fi Spelunky-inspired game, but it just doesn't work.. Another OrangePixel game, like all of them, that would've been great however ruins itself the same way the others did.
